

REGISTER OF RAINFALL IN 1879

Kept at Carleton House Grey Ireland by M. Braun & Gardener
 Latitude 52° 39' N East of London Diameter 5 in. Les
 Time of Observation 9 a.m. Receiver of Rain Gauge { Height above Ground 3 ft.
 Longitude 6° 14' W. { Above Sea Level about 80 ft.

CONDENSED INSTRUCTIONS.—Fix the gauge firmly, with its orifice level and 1 ft. above the ground, quite clear of trees and walls, empty it daily at 9 a.m., and enter it against the preceding day. When snow is not melted at the proper time for measuring, melt what is caught in the funnel by adding to the snow a previously ascertained quantity of warm water, and then deducting this quantity from the total measurement, enter the residue as rain. When there is no rain, a line should be drawn, rather than cyphers inserted.

Observers will oblige by sending either a copy of this Register, or even the monthly totals, to Mr. G. J. SYMONS, of 62, Camden Square, London, N.W.
 for insertion in his annual tables of *British Rainfall*, which now contain returns from more than 1500 stations.
 Additional copies of this form (price 3d. each) can be obtained of the above, from Mr. STANFORD, 6 & 7, Charing Cross, and from all the leading opticians
